PROFILE SUMMARY

Computer Science student (5th semester) at Air University with a strong foundation in software development and full-stack web development. Skilled in building web applications and MERN stack projects, currently seeking a Software Developer/Web Developer role to apply my skills and grow professionally.

EDUCATION

- BS Computer Science – Air University (2024-2028)
- FSc Pre-Engineering – Nishat College of Science (2022-2024)
- Matric (Science) – Nishat High School (2020-2022)

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, HTML, CSS, C# (.NET)

Concepts: OOP, DSA, File Handling, Database Integration, Networking Basics, Software Design

Web Technologies: Frontend Development, WordPress

Tools: VS Code, Visual Studio, Git

PROJECTS

- BazaarPK — Online Marketplace | MERN Stack — Full-stack e-commerce platform with JWT auth, role-based seller/buyer access, complete product/order CRUD, Stripe payments, and a localized JazzCash/EasyPaisa payment flow for the Pakistani market.
- CourierHub — Courier Management Dashboard | MERN Stack — Full-stack courier management system for Pakistani e-commerce sellers featuring multi-carrier shipping API integration (TCS, Leopards, M&P), real-time order tracking, secure JWT-based role access control, and dynamic analytics with Recharts.
- Amusement Park Management System (C++) — Developed a management system featuring ticketing, billing, file handling, database integration, and role-based login functionality.
- E-Commerce Web Application (HTML, CSS, JavaScript) — Designed and developed a responsive e-commerce frontend with product listings, modern UI, and interactive features.
- Clothing Store Application (.NET) — Built a backend-driven store application with database integration and data management features.
- Pharmacy Management System (Software Engineering) — Prepared system design, Software Requirements Specification (SRS), and complete project documentation for a pharmacy management solution (Theory Project).

Experience

Assistant Web Developer | Dream Weavers | June 2026 – Present

Developed client websites and MERN stack projects, collaborated on responsive web solutions, and implemented UI enhancements using WordPress, Elementor, React, Node.js, Express.js, and MongoDB.

Certifications

- Data Science & Analytics — HP
- Introduction to Large Language Models — HP
- Introduction to Generative AI — HP
- Build a Website with WordPress — [Coursera](#)
- Excel Basics for Data Analysis — [Coursera](#)
- Canva Design Basics — Coursera
- Certificate of Appreciation — TechXhibit 2026
- Air University Multan Campus (ACM-W) | Event Management & Coordination

Memberships & Activities

- Member – ACM-W (Association for Computing Machinery – Women)

Core Strengths

- Strong problem-solving and analytical thinking abilities
- Quick learner with the ability to adapt to new technologies efficiently
- Effective teamwork and collaboration skills in group environments
- Strong verbal and written communication skills
- Actively engaged in developing real-world software and networking projects
- Highly motivated to gain practical industry experience and improve technical expertise
